**Authority for maintenance of the system:** P.L. 89-329 and P.L. 89-508. (20 U.S.C. 1071 through 1089).

Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department,

any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** The records are maintained on paper and on magnetic tape and are stored in locked metal filing cabinets.

**Retrievability:** Student name and ID number are kept in one file. In a separate file, the data base itself is kept; data are indexed by Student ID number only. These data contain further identifiers based on district, school building, grade and classroom. A separate file will indicate what kinds of data were collected on the total student population at different points in time. The data base file consists of computer tapes. Test instruments will be kept stored separately, indexed by type of data, district, school building, grade and classroom. Retrieval by Contractor for purposes of analysis and further data collection. Retrieval may be done by Contractor for System Manager for purposes consistent with this evaluation and the Privacy Act.

**Safeguards:** The student name and ID number 'link' file is kept separately from the data base. Access to this file, which is kept under lock, is restricted to the data base manager and to senior project staff, i.e., the project director and the principal investigator. The 'link' file will be utilized only during the data-collection and data-analysis phases and will be destroyed once the data analysis for the study has been completed. Exception: Subject to disclosure requirements of the Privacy Act. Before any data are released by the Contractor to the Government, not only will the link file be destroyed, but entirely new randomly assigned code numbers will be applied to each student data record. It will be done in such a way that not even the district from which the student's record comes will be identifiable. This will eliminate any possible remaining connection between student name on the one hand and the student records provided to the Government on the other hand.

**Retention and disposal:** All data will be destroyed upon completion of contract requirements. Paper files will be destroyed by maceration and magnetic tapes will be erased.

**Categories of individuals covered by the system:** Employees of Columbus Coated Fabrics, Columbus, Ohio.

**Categories of records in the system:** Medical questionnaire, demographic data.

**Authority for maintenance of the system:** Occupational Safety and Health Act Section 20(29 U.S.C. 669).

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. Records may be released to the Department of Justice or other appropriate Federal Agencies in defending claims against the U. S. when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual. (Appendix B, Department Regulations, (45 CFR Part 5b), item 100). Portions of records (name, social security number if known, date of birth, and last known address) may be disclosed to one or more other sources selected from those listed in Appendix I, as applicable. This may be done solely for obtaining a determination as to whether or not an individual has died. The purpose of determining death is so that NIOSH may obtain death certificates, which state the cause of death, from the appropriate Federal, state, or local agency. Cause of death will enable NIOSH to evaluate whether excess occupationally related mortality is occurring. In the event of litigation where one of the parties is (a) the

Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Computer tape, microfilm, microfiche, computer printouts, manual files.

**Categories of individuals covered by the system:** Trichloroethylene, polychlorinated biphenols, ethylene biondiomine, and chloroprene exposed workers in selected plants.

**Categories of records in the system:** Questionnaires, Physical Examinations, Occupational History, and Sputum Cytology.

**Authority for maintenance of the system:** Occupational Safety and Health Act, Section 20 (29 U.S.C. 669).

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. Records may be released to the Department of Justice or other appropriate Federal Agencies in defending claims against the U. S. when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual. (Appendix B, Department Regulations, (45 CFR Part 5b), item 100). Portions of records (name, social security number if known, date of birth, and last known address) may be disclosed to one or more other sources selected from those listed in Appendix I, as applicable. This may be done solely for obtaining a determination as to whether or not an individual has died. The purpose of determining death is so that NIOSH may obtain death certificates, which state the cause of death, from the appropriate Federal, state, or local agency. Cause of death will enable NIOSH to evaluate whether excess occupationally related mortality is occurring. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

The purpose of determining death is so that NIOSH may obtain death certificates, which state the cause of death, from the appropriate Federal, state, or local agency. Cause of death will enable NIOSH to evaluate whether excess occupationally related mortality is occurring. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. Records may be released to the Department of Justice or other appropriate Federal Agencies in defending claims against the U. S. when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual. (Appendix B, Department Regulations, (45 CFR Part 5b), item 100). **Security classification:** None.

**System location:**

Center Building  
3700 East-West Highway  
Hyattsville, Maryland 20782

**Categories of individuals covered by the system:** Individuals and members of households selected by probability sampling techniques to be representative of the civilian noninstitutionalized population of the United States.

**Categories of records in the system:** Statistical records containing information on: (1) the incidence of illness and accidental injuries, prevalence of diseases and impairments, the extent of disability, the utilization and cost of health care services, and other health characteristics of individuals obtained in household interviews and from their named health care providers and insurers; or (2) the nutritional status, prevalence levels of specially defined chronic diseases, growth and development patterns and distributions of various health related measurements and related data obtained in a survey involving health examinations, tests, and other measurement procedures; or (3) marital and child bearing history and intended future births, the use of prenatal care, and the family planning practices of individual women obtained by interview. Demographic and socioeconomic characteristics such as age, marital status, education, occupation, and family income are also obtained for individuals in this system of statistical records.

**Authority for maintenance of the system:** Public Health Service Act Section 306(b) (42 U.S.C. 242k).

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** The data are disseminated for purposes of statistical research and analysis outside HEW in forms which do not permit the identification of individuals, such as publications of statistical tables, specially requested tabulations, and public use computer tapes. These are communicated to interested persons outside HEW, such as members of Congress and their staffs, other executive branch agencies, universities, States, cities, private foundations, etc. The findings are used by demographers, sociologists, health statisticians, epidemiologists, other scholars and concerned citizens, to evaluate health matters, make determinations on needs for legislation, appropriations, new service programs, and the like. Data collection, processing, and analysis are from time to time conducted for NCHS by private contractors, under guarantees by the contractors of confidentiality. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** The records are transferred onto magnetic tapes without name and address information and are maintained on magnetic tapes for an indefinite period.

**Retrievability:** A serial number tied to the selection process of successively smaller geographic areas is assigned to each record on magnetic tape. This serial number also appears on the original record. Each magnetic tape containing records in this system has a unique identification number and title. Original survey records are reviewed for accuracy, edited, and data (without personal identifiers such as name or SSN) are transferred to magnetic tape. Then the original records and/or microfilms are stored at the Federal Records Center. The tape is used for statistical purposes only. These uses include the preparation of aggregated data in the form of statistical tables for publication, analysis, and interpretation, to meet the legislative mandates of P.L. 93-353, to determine levels of illness and disability and their effects on the population, the use of health care facilities, trends in family formation and dissolution, and the like. Users consist of health planners, statisti-

cians, epidemiologists, demographers, and others concerned with the problems of health and health care.

**Safeguards:** All employees of NCHS, as a condition of employment, sign an affidavit binding them to nondisclosure of identifiable individual information. Since the magnetic tapes have no name and address information, users of the tape could only identify specific individuals by relating the serial number on the tape to the original record. Only employees of NCHS are permitted access to the magnetic tapes with the serial numbers described above or to the files containing the original records or microfilms. Magnetic tapes with personal identifiers of individual records removed are made available for public use.

**Retention and disposal:** The original records are retained in office files of NCHS until the process of conversion to magnetic tape and verification of information is completed. This process is completed within approximately nine months. The original records are then sent to the Federal Records Center where they are stored for 5 years for interview survey records and 10 years for examination records. Microfilm copies of examination records are retained at the Federal Records Center for 40 years.

09-35-0035

System name: Vital Statistics for births, deaths, fetal deaths, marriages and divorces occurring in the United States during each year. HEW/HRA/NCHS.

Security classification: None.

System location:

Center Building  
3700 East-West Highway  
Hyattsville, Maryland 20782

Categories of individuals covered by the system: Individuals who are born and their parents; individuals who die; individuals who are married or divorced; and parents experiencing fetal deaths.

Categories of records in the system: The records include microfilm images of State records or machine-readable data prepared by the State from records collected under the laws of each State for births, deaths, fetal deaths, marriages and divorces. The records contain the demographic characteristics of individuals associated with each event. In addition, the birth records include information on the characteristics of each live birth, the health status of the infant, and socioeconomic characteristics of the parents. The death records contain medical information relating to cause of death and to socioeconomic characteristics of the deceased; the fetal death record contains medical information relating to cause of death and socioeconomic characteristics of the parents. Marriages and divorces include demographic and socioeconomic characteristics of both parties to the event and legal information regarding the event.

Periodically the National Center for Health Statistics conducts followback surveys, collecting information on random samples of births and deaths through mail questionnaires. The followback surveys are designed primarily to expand the scope of data that can be collected from the national registration system, to make the registration system more responsive to changing needs for data, and to evaluate the quality of data collected on the birth and death records. The content of questionnaires for the followback surveys varies. Past surveys have collected information on such topics as hospital utilization in the last year of life, smoking habits of the deceased, health status of infants, and pregnancy and employment histories of mothers.

Authority for maintenance of the system: Public Health Service Act Section 306(h) (42 USC 242 k).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The processed data are disseminated for public use in forms that do not permit identification of individuals, such as published statistical tables, special unpublished tabulations, and public use computer tapes, which carry no individual identifiers. They are used by members of Congress and their staffs, other executive branch agencies, State and city governments, public and private research institutions, life insurance companies, faculty and students of universities, physicians, workers in health information, newspaper reporters and feature writers, etc. The findings are used to make determinations on needs for legislation, appropriations, and programs in the health field; to pinpoint health problems, measure progress of national health programs, and make population estimates; for epidemiological studies, marketing research, sociological studies, and studies of the family; and for other research directed at understanding our society. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that

Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** The records are transferred onto magnetic tapes without name and address information and are maintained on magnetic tapes for an indefinite period.

**Retrievability:** The State file number is assigned to each record on magnetic tape linking it to the original certificate on file in the State vital statistics office. Data from the microfilm copies of certificates of births, deaths, fetal deaths, marriages and divorces submitted by some States are transferred to magnetic tape in coded form (without names or addresses) and are merged with the machine-readable data tapes furnished by States providing data through the Cooperative Health Statistics System. The tape is used for statistical purposes only. These uses include the preparation of aggregated data in the form of statistical tables for publication, analysis, and interpretation, to meet the legislative mandates of Public Law 93-353, i.e., to determine the extent and nature of illness and disability of the population of the U.S., including life expectancy and levels of infant and maternal mortality, environmental and other health hazards, trends in family formation, growth, and dissolution, and other related matters. Users consist of health planners, statisticians, epidemiologists, demographers, and others concerned with the problems of health, health care, and health hazards.

**Safeguards:** All employees of NCHS, as a condition of employment, sign an affidavit binding them to nondisclosure of identifiable individual information. Only employees of NCHS or employees of contractors who have signed similar affidavits are permitted access to the magnetic tapes containing the certificate numbers or to the files containing the microfilm copies of the certificates. The certificate numbers of the individual records and the geographic code identification of cities with less than 250,000 population, are removed before the data tapes are released for public use. No identifying number appears on the public use tape that would link a record on that tape to any individual, to the NCHS master tape, to the microfilm file, or to the original certificate in the State vital statistics office.

**Retention and disposal:** The microfilm copies of the records are retained in office files of NCHS until the process of conversion to magnetic tape and verification of information is completed. The death records are sent to the Federal Records Center ten years after tabulation for deaths occurring during the three-year period surrounding census years and one year after tabulation for other years. They are held until disposed of, 15 years after tabulation for deaths of the census years, and five years after tabulation for other years. Records of births, fetal deaths, marriages, and divorces are disposed of two years after tabulation. The questionnaires for the followback surveys are destroyed after conversion to magnetic tape, tabulation, and analyses have been completed.

**Record source categories:** Vital statistics records are obtained from state vital statistics offices or, in rare instances, from other state or county repositories of marriage or divorce data. **Categories of individuals covered by the system:** Recipients of medical care included in statistical surveys and reports of the National Center for Health Statistics (NCHS), including: (1) staff and residents of nursing homes selected by random sampling techniques to be representative of nursing homes in the U.S.; (2) physicians providing office based medical care and patients visiting such

physicians; (3) medical records from selected short-stay hospitals; and (4) persons visiting the family planning facilities participating in the National Reporting System for Family Planning Services.

**Categories of records in the system:** Statistical records containing information on: (1) the utilization of nursing home care through data on residents (demographic and social characteristics, health status, and charges paid for care) and the facility (general characteristics, certification, services offered, and expense); (2) the demographic characteristics, medical and other problems of persons visiting physicians' offices, and the physicians' diagnoses, treatment, and disposition decisions made during such visits as obtained from physicians during randomly assigned one-week survey periods; (3) the demographic characteristics, administrative information (admission and discharge dates, discharge status, and medical record number), and medical information (diagnoses and surgical procedures abstracted from the face sheet of short stay hospital medical records); and (4) family planning medical services provided by the clinics participating in a nationwide sample survey reporting system, the demographic and socioeconomic characteristics, including education and welfare status, of the recipients of these services, and the extent to which these services (excluding physicians' offices) are funded by Federal grants. In many cases, these records do not contain individual identifiers when they come under control of the National Center for Health Statistics; they carry only sequence numbers, which only the originating agency would be able to translate into a personal identifier--and even then, not in all cases. Names of residents and staff of nursing homes and patients of physicians are listed on separated forms for sampling purposes only and are not included in the final statistical records.

**Authority for maintenance of the system:** Public Health Service Act, Section 306(b)(42 U.S.C. 242k).

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** The data are disseminated for: (1) purposes of statistical research and analysis, and in the case of family planning statistics, for executing national family planning programs; (2) outside of DHEW in forms which do not permit the identification of individuals, such as publications of statistical tables, specially requested tabulations, and public use computer tapes. These are communicated to interested persons outside DHEW, such as members of Congress and their staffs, other executive branch agencies, universities and medical schools, State and local health planning agencies, private foundations, etc. The findings are used by demographers, sociologists, health statisticians, epidemiologists, medical educators, health planners, other scholars, and concerned citizens, to evaluate health matters, make determinations on needs for legislation, appropriations, new service programs, and the like. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** The records are transferred onto magnetic tapes without name and address information and are maintained on magnetic tapes for an indefinite period.

**Retrievability:** Data are retrieved by individual identifier only in the editing stage of data processing and only for the purpose of correcting errors in the recording of information. Original survey records are reviewed for accuracy and edited, then data (without personal identifiers such as name or social security number) are transferred to magnetic tape. The original records are stored at the Federal Records Center. The tape is used for statistical purposes only, as specified by statute, Section 308(d) of Public Law 93-353. These uses include the preparation of aggregated data in the form of statistical tables for publication, analysis and interpretation to meet the legislative mandates of Public Law 93-353, i.e., collection of statistics on the utilization of health services, including the utilization of: (1) nursing home facilities to determine levels of illness and disability, effects on the institutionalized population, and the costs of care; (2) ambulatory health services by specialties and

types of practice of the health professionals providing such services; (3) short-stay hospitals to determine characteristics of patients, length of stay, diagnosis and surgical operations, and patterns of use of care in hospitals of different size and ownership; (4) family planning facilities to provide statistics on the size of and services dispensed by these facilities, the numbers and characteristics of family planning patients, the overall proportion of the 'target population' which is being reached by family planning programs on a national scale, and the like. The family planning data are distributed to the Deputy Assistant Secretary for Population Affairs, DHEW, the Bureau of Community Health Services, and others for the purpose of executing national family planning programs.

**Safeguards:** All employees of the National Center for Health Statistics, as a condition of employment, sign an affidavit binding them to nondisclosure of identifiable individual information. Since the magnetic data tapes have no name and address information, users of the tape could only identify specific individuals by relating the identification number on the tape to the original record. Only employees of NCHS, NCHS contractors, the agency supplying the information in the first instance, or third parties with the written permission of the agency supplying the information are permitted access to the magnetic tapes with the identifying numbers described above or to the files containing the original reporting instruments. Magnetic tapes with identification numbers removed are made available to the public for statistical uses.

**Retention and disposal:** The original records are retained in office files of NCHS or NCHS contractors for two years. The procedure for family planning records differs in that the original documents are retained in office files for only two months. In all instances, the original records are then sent to the Federal Records Center where they are stored for five years.

System name: Independent Laboratory Directors Proficiency  
Answer Sheets and Exam Results (Medicare).  
HEW/HSA/BQA.

Security classification: None.

System location:

Parklawn Building  
5600 Fishers Lane  
Rockville, Md. 20857  
and Regional Federal Records Center

Categories of individuals covered by the system: Independent  
laboratory directors.

Categories of records in the system: Examination scores. Answer  
Sheets.

Authority for maintenance of the system: 5 U.S.C. 301; 44 U.S.C.  
3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: (1) Uses - Lists showing by states the names and addresses of individuals who passed or failed examinations were made available to the appropriate State Health Department. Pursuant to Department regulations, (42 CFR 5b) Appendix B, Item (3): In the event the Department deems it desirable or necessary in determining whether particular records are required to be disclosed under the Freedom of Information Act, disclosures may be made to the Department of Justice for the purpose of obtaining its advice. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. (2) Purpose - Lists indicated only pass or fail, and were used to advise an individual who failed the exam when the next examination would be given. (3) Users - State Health Department. Because of the length of time that has elapsed since the last examination was given in 1970, it is not known if State Health Departments still retain unscored records of examinees.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Computer generated listings are filed by discipline, by State, in file folders.

**Retrievability:** Retrievability - Listings are by examination, State, examinee's name and address, and examination number. (1) Uses - One record of all examinees is maintained for the purpose of responding to an individual examinee. (2) Purpose - (1) Pass - to re-issue a new card to those who pass, for reasons they have lost their card, or have changed their name (upon written request) (2) Fail - re-advise what their scores were by subject upon written request. (3) Users - Systems Manager and project officers.

**Safeguards:** Files are maintained in a combination lock file cabinet, in a locked room area. For computerized records, safeguards established in accordance with Department standards and National Bureau of Standards guidelines (e.g. security codes) will be used, limiting access to authorized personnel.

**Retention and disposal:** Lists are to be retained through FY 1978. They will then be filed at Federal Records Center for a period of three years. If at the expiration of that time the records are no longer of use, FRC will be authorized to destroy by incineration or shredding.
